1. **3. Implement a given strategy to determine a mathematical solution**
   - The problem clearly requires calculating the percentage increase, using the fixed strategy of $\frac{\text{difference}}{\text{original value}} \times 100\%$.
2. **7. Manipulate numbers, graphical and statistical data and information, algebraic expressions and equations**
   - Directly involves numerical operations and percentage formula.
3. **8. Articulate a solution, showing and/or summarising and presenting intermediate mathematical results**
   - The solution requires showing the steps: difference, dividing by the original value, converting to percentage.
4. **1. Perform a simple calculation**
   - This is basic arithmetic.
5. **13. Use an understanding of the context to guide or expedite the mathematical solving process, e.g. working to a context-appropriate level of accuracy**
   - The word "approximately" in the question suggests some tolerance for approximation, but the options are precise—in practice, one must calculate to the nearest whole percentage to match the given choices.
6. **12. Use a multi-step procedure leading to a mathematical solution, conclusion or generalisation**
   - Steps: Read the problem → extract data → choose formula → compute → match to option.

1. **3. Implement a given strategy to determine a mathematical solution**
   - 题目明确要求计算百分比增长，需用 $\frac{\text{差值}}{\text{原值}} \times 100\%$ 这一固定策略执行。
2. **7. Manipulate numbers, graphical and statistical data and information, algebraic expressions and equations**
   - 直接涉及数字运算与百分比公式。
3. **8. Articulate a solution, showing and/or summarising and presenting intermediate mathematical results**
   - 解答时需要展示计算步骤：差值、除以原值、转化为百分比。
4. **1. Perform a simple calculation**
   - 这是基础算术运算。
5. **13. Use an understanding of the context to guide or expedite the mathematical solving process, e.g. working to a context-appropriate level of accuracy**
   - 题目中“approximately”提示允许一定近似，但选项明确，实际需精确到整数百分比以匹配选项。
6. **12. Use a multi-step procedure leading to a mathematical solution, conclusion or generalisation**
   - 步骤：读题 → 提取数据 → 选择公式 → 计算 → 匹配选项。
